Products**

Division 7, Inc. is an architectural metal fabricator, sandwich panel manufacturer, and a stocking distributor for sealants, adhesives and supporting products for commercial construction and industry.

We have carefully developed our fabricating capabilities to ensure high quality products delivered to meet the aggressive time lines of commercial construction projects.

We choose to represent only products that set the standards for excellence in their respective markets. From initial design, to quotation to delivery, we provide extraordinary personalized service. Give us the opportunity to earn your business and trust.

Division 7, Inc.

Insulated Sandwich Panels

We will custom manufacture panels to your specifications. Choose from a wide variety of combinations to meet your design requirements. Specify the materials and thickness and we will build the panels and ship them cut to size.

- Glazing Infill
- Interior partitions
- Sound Proofing
- Curtain Wall Applications
- Decorative Panels
- Panel Systems

Typical Panel skins:

Aluminum (.032, .040, .050) or Steel (24G) in over 30 Standard Kynar Paint Finishes.

Anodized Aluminum Finishes (Clear, Black, Dark Bronze, Med. Bronze, Light Bronze and Champagne)

Stainless Steel in Mill Finish, #4 Brushed and #8 Mirror, Spandrel Glass

Typical Panel Stabilizers:

Premium Tempered Hardboard

Fiber Cement Board

Minerit Fiber Cement Board

Gypsum Board

Typical Insulating Core:

Polyisocyanurate (2# Density, highest insulating value)

Polystyrene (2# Density, most cost effective)

Contact us for product samples, color chips, warranty information, ASTM testing data, and estimated R values.

D7 Division 7, Inc.

Architectural Metal Fabrication

Have us fabricate aluminum plate panel systems, column covers, sill flashing, box gutters, flat lock panel systems, standing seam roof panels, coping and gravel stop to your specifications.

We will share our experience with you from initial design, through fabrication to installation procedures.

We stock a wide variety of aluminum, steel, stainless steel and copper. Our stock includes:

Standard Stock:

- Clear, Champagne, Light Bronze, Medium Bronze, Dark Bronze and Black Anodized Aluminum Finishes.
- Over 30 Standard Kynar Paint Finishes
- Aluminum thicknesses from .032 to ¼"
- Mill Finish, #4 Brushed and #8 Mirror Stainless Steel.
- Galvanized Steel 24G through 10G
- 16 oz. Copper and 26 G TCS

Our large stock allows for immediate shipment of your material. We crate and ship throughout the United States.

Capabilities:

Press Brakes: 3/8" Thick Aluminum, Up to 12' Lengths

Shearing: 3/8" Aluminum, 1/4" Mild Steel 12' Lengths

Punching: ¼" Aluminum and ¼" Mild Steel

Welding: Tig Welding of Aluminum, Steel & Stainless Steel

Sawing: Wood, Fiber Cement Board, Plastics & Insulation

Laminating Line: 4' wide to 10' long.

Chem-Calk®

Sealants

Urethane and Hybrid sealants for construction and industry. Contact us for advice on the appropriate product for your application.

Bostik 915: Construction grade urethane sealant. It is the urethane we most commonly sell to commercial contractors. Meets ASTM C-920, Type S, Grade NS Class 35, Use NT; US Federal Specification TT-SS-00230C, Type II Class A.

Bostik 900: Premium Urethane Sealant for perimeter sealing windows and doors, vertical expansion and control joints in concrete. It bonds to most common building substrates.

Bostik 2000: Is a one-component advanced hybrid sealant. It is non-yellowing with long lasting elastomeric properties.

Bostik 1100: One-part fast setting urethane sealant commonly used in the manufacturing of RVs, truck bodies and trailers.

Bostik Marine Grade Sealants: One-part fast setting sealants in a variety of chemistries for sealing above and below the water line.

Download Marine Products Brochure

Bostik Sealants for Industry: Products designed for sealing and adhering applications in the transportation industry. Including; side panel assembly, glass mounting, subfloor construction, and molding and trim attachment.

Empire State Building newly sealed with GE SCS 9000

Distributor

GE Silicone Building Sealants

The sealants of choice for architecturally significant projects throughout the world, and the products to trust when your reputation is on the line.

SilPruf SCS2000: The workhorse of the glazing industry. A high-performance silicone sealant for use as a weatherseal in both conventional and structural glazing applications. It will provide weatherproof adhesion to most common building substrates. A tooling time of 30 minutes ensures easy application. It has been used as a weather seal in building and curtainwall joints since 1974. It is available in a variety of packaging and can be provided in custom color matches. +-50% Movement Capability.

SilPruf NB SCS9000: A new generation of silicone sealant specifically formulated to reduce dirt pick-up and surface streaking. It is designed not to stain porous stone materials such as marble, granite and limestone. It is the architect's product of choice for visually significant buildings. +-50% Movement Capability.

SilPruf LM SCS 2700: Low modulus silicone sealant for use on EIFS systems, concrete, and metal. Matte finish. +100% / - 50% Movement Capability.

GE SWS: Neutral Cure, Economical Silicone Building Sealant priced to compete with urethane based products while providing the superior performance of silicone. +-35% Movement Capability.

SilGlaze II SCS2800: Neutral, fast curing technology that results in excellent adhesion to wood, vinyl, glass, aluminum, kynar resin based paint finishes, and PVC. Works well with automated glazing equipment (6-12 minute tool time). +-25% Joint Movement.

Contractors SCS1000: Acetoxy cure basic silicone sealant for ceramic tile, tubs, spas, plumbing fixtures and metals. +-25% Joint Movement.

Adhesives

Adhesives for Construction and Industry

SuperTak Contact Adhesives: Solvent based contact adhesives packaged in 5 gallon pails or safe, easy to handle aerosol cans. They deliver reliable bonds in a variety of applications.

Cyanoacrylate and Epoxy Adhesives: Form permanent bonds to most substrates. They come in one and two-part systems and a range of cure times.

Hot Melt Adhesives: Offer a quick and economical way to bond a wide range of materials; wood, metal, glass, plastics, coated and uncoated cardboard. Available in glue sticks and bulk form.

Liquid Adhesives: Complete line of advanced solvent and water based adhesives commonly used in product assembly, aerospace, and transportation industries.

Urethane Construction Adhesive: A superior construction adhesive for subfloor assembly and many other general construction applications.

Contact us for advice and product samples to test in your application.
